Professional Summary

Azure Cloud Engineer managing 20+ Microsoft Azure subscriptions and approximately 100 virtual machines. Experienced in Linux and Windows Server administration, Active Directory, on-premises to Azure migration with live production data, disaster recovery, monitoring and Azure cost optimization (10–15% savings per client). Also builds Microsoft Copilot Studio agents and full-stack tools (React, TypeScript, Node.js).

Technical Skills

Microsoft Azure: Virtual Machines, Virtual Networks, Network Security Groups (NSG), VPN Gateway, Application Gateway, App Service, Storage, Site Recovery, Recovery Services Vault, Azure Backup, Azure Monitor, Log Analytics, Microsoft Entra ID, Azure Lighthouse, Azure RBAC
Systems Administration: Linux Administration, Windows Server Administration, Active Directory, DNS, RDP/SSH, SMB
Cloud Operations: Cloud Migration (on-premises to Azure), Disaster Recovery, Backup and Retention, Monitoring and Alerting, Incident Troubleshooting, Cost Optimization, Cloud Governance, AWS-to-Azure Assessment
Automation and DevOps: Azure CLI, PowerShell, Bash, GitHub Actions, Docker
AI and Low-Code: Microsoft Copilot Studio, AI Agents, Claude Code
Development: JavaScript, TypeScript, React.js, Node.js, REST APIs, MongoDB, MySQL, Azure APIs

Professional Experience

Cloud Engineer, Truverizen Technologies Pvt. Ltd., Noida, India — May 2026 – Present

- Manage 20+ Azure subscriptions and approximately 100 virtual machines; automate provisioning and cloud operations across networking, storage, App Services and access controls.
- Administer 100+ Linux and Windows Server workloads and Active Directory identities across client tenants.
- Execute on-premises to Azure migrations for multiple clients with live production data during cutover windows.
- Reduce client Azure spend by 10–15% per engagement through VM rightsizing, unused-resource removal and budgeting.
- Design disaster recovery using Azure Site Recovery, Recovery Services Vault and Site-to-Site IPsec VPN; configure Azure Monitor and Log Analytics across 20+ subscriptions; validate backup retention.
- Resolve NSG, VPN, Application Gateway, DNS, RDP/SSH and SMB incidents; deliver architecture diagrams, bills of materials (BOM), runbooks and client proposals.
- Build 4 Microsoft Copilot Studio agents (ER, HR, procurement, business user) connecting multiple data sources to streamline internal workflows.
- Develop a multi-tenant Azure Cost and Governance Dashboard and React, TypeScript and Node.js applications for real-time subscription and cost monitoring.

Cloud Support Engineer, Truverizen Technologies Pvt. Ltd., Noida, India — Nov 2025 – Apr 2026

- Monitored Azure Backup and alerting across multi-subscription client environments; triaged networking and security incidents using Azure CLI and Linux.
- Delivered migration assessments and AWS-to-Azure mappings (VM sizing, cost estimates); implemented SSO-integrated AI tooling.

Key Projects

- **Azure Cost and Governance Dashboard:** Multi-tenant dashboard (Azure APIs, RBAC, 20+ subscriptions) showing budgets, limits, security recommendations and per-service cost in real time.
- **Copilot Studio Agents:** 4 agents (ER, HR, procurement, business user) automating internal workflows.
- **On-Premises to Azure Migration:** Migrated client workloads to Azure with live production data.
- **Azure Site Recovery DR POC (2026):** Active-passive failover for a Windows Server file-server workload; validated recovery networks and ASR mobility services.

Education

B.Tech in Computer Science and Engineering, IIIT Ranchi, India (CGPA: 8.25/10) — Dec 2021 – May 2025

Certifications, Languages and Awards

Certifications: Azure Zero to Hero (Udemy); AWS Cloud (Udemy); AWS Business, Technical and Sales; DevOps and AI (GeeksforGeeks); Agentic AI Developer (Ready Tensor); Full Stack Web Development (Sheriyans Coding School)
Languages: Hindi (Native), English (Professional Working Proficiency). **Awards:** Silver Medal, International Maths Olympiad (2014); three-time Bronze Medalist, National Science Olympiad
