PROFESSIONAL SUMMARY

Cloud Operations and Azure Infrastructure professional with hands-on experience supporting Microsoft Azure environments, infrastructure provisioning, networking, monitoring, backup, disaster recovery, and client-facing cloud solution design. Experienced with Azure Virtual Machines, VNets, NSGs, VPN Gateway, Application Gateway, Azure Site Recovery (ASR), Recovery Services Vault, Azure Monitor, Log Analytics, Microsoft Entra ID, Azure CLI, and Azure cost/architecture planning. Also bring full-stack development experience, enabling effective collaboration with application teams and understanding of application infrastructure dependencies.

TECHNICAL SKILLS

Cloud & Azure: Microsoft Azure, Azure VMs, Virtual Networks, Subnets, NSGs, VPN Gateway, Application Gateway, App Service, Storage, Recovery Services Vault, Azure Site Recovery, Azure Monitor, Log Analytics, Azure Backup, Microsoft Entra ID, Azure Lighthouse

Azure Operations: Infrastructure Provisioning, Resource Groups, Subscription Management, Monitoring & Alerting, Backup & Recovery, DR Planning, Cost Estimation, Governance Concepts, Access Control, Incident Troubleshooting

Networking: VNets, Subnets, NSGs, Routing, Public/Private IP, S2S IPsec VPN, P2S VPN, DNS, TCP/IP, RDP, SSH, SMB, Application Gateway

Automation & DevOps: Azure CLI, PowerShell, Git, GitHub Actions, Docker, CI/CD, Linux CLI, Infrastructure-as-Code Concepts (ARM/Bicep/Terraform)

Security & Identity: Microsoft Entra ID, RBAC, Least-Privilege Concepts, NSGs, VPN Security, WAF Concepts, Secure Access

Development: JavaScript, TypeScript, React.js, Node.js, Express.js, REST APIs, MongoDB, MySQL, Tailwind CSS

EXPERIENCE

Cloud Operations / Full Stack Developer

Nov 2025 – Present

Truverizen Technologies Pvt. Ltd.

Bengaluru, KA

- Administer and support **Microsoft Azure environments**, including Virtual Machines, Resource Groups, VNets, subnets, NSGs, storage, App Services, public/private networking, and access controls.
- Provision and configure Azure infrastructure for client workloads, preparing **architecture designs, BOMs, sizing recommendations, deployment plans, and cost estimates** aligned with business and operational requirements.
- Designed and supported **Azure disaster recovery solutions using Azure Site Recovery (ASR)**, Recovery Services Vault, Azure Virtual Networks, and Site-to-Site IPsec VPN connectivity for on-premises workloads.
- Worked on a DR POC for a physical **Windows Server 2022 / file-server workload**, validating replication, failover considerations, Azure VM sizing, networking, SMB connectivity, and recovery architecture.
- Designed Azure DR connectivity using **VPN Gateway, S2S IPsec VPN, DNS, Active Directory, routing, NSGs, and controlled access** to support business users and application dependencies during a disaster scenario.
- Configured and analyzed **Azure Monitor and Log Analytics** for operational monitoring and alerting, including CPU, memory, disk, and infrastructure health thresholds.
- Managed **Azure Backup and Recovery Services Vault** configurations, reviewed backup protection health, retention policies, SQL backup settings, and performed operational validation of protected workloads.
- Supported Azure networking and security troubleshooting involving **NSG rules, RDP/SSH, TCP 445 SMB, VPN connectivity, public/private IP addressing, Application Gateway, and routing**.
- Worked on **Azure migration assessments and cloud architecture planning**, including workload analysis, AWS-to-Azure service mapping, VM sizing, storage selection, networking design, and infrastructure cost estimation.
- Prepared client-facing **cloud solution proposals, architecture diagrams, technical documentation, runbooks, DR procedures, BOMs, and implementation plans**.
- Used **Azure CLI and Linux command-line tools** for resource administration, troubleshooting, configuration validation, and operational tasks.
- Collaborated with application and client teams to understand infrastructure dependencies, troubleshoot production/POC issues, and align cloud infrastructure with application delivery and DR requirements.
- Contributed to automation and operational improvement by standardizing recurring cloud administration, monitoring, backup, documentation, and deployment activities.
- Developed internal and client-facing web applications using **React, TypeScript, Node.js, and REST APIs**, providing application-side understanding while supporting cloud infrastructure operations.

SELECTED CLOUD & INFRASTRUCTURE WORK

Azure Site Recovery – Enterprise DR POC | *Azure ASR, Recovery Services Vault, VPN, VNet, Windows Server 2022*

- Designed an active-passive Azure DR architecture for an on-premises environment, covering replication, failover, networking, DNS/AD dependencies, user access, and recovery validation.
- Worked through ASR mobility-service and kernel compatibility troubleshooting during POC implementation and validated Azure VM recovery-network configuration.

Azure Monitoring & Backup Operations | *Azure Monitor, Log Analytics, Recovery Services Vault* 2026

- Configured operational monitoring and alert thresholds for CPU, memory, disk performance, and infrastructure health, with backup protection and retention validation.
- Reviewed backup health and protection status and supported recurring operational reporting and troubleshooting.

- Azure Cloud Architecture & Migration Assessments | *Azure, AWS, Networking, Costing***2026
- Prepared Azure target architectures and BOMs for compute, storage, networking, security, backup, DR, and connectivity requirements.

– Mapped AWS workloads to Azure services and evaluated VM sizing, disk tiers, network topology, VPN connectivity, and estimated cloud costs.

EDUCATION

- Indian Institute of Information Technology (IIIT) Ranchi**Dec 2021 – May 2025

*Bachelor of Technology in Computer Science and Engineering (CGPA: 8.25/10)**Ranchi, Jharkhand*
- Ch. Baldev Singh Model School / D.A.V Public School**2019 – 2021

*Intermediate (75%) / Matriculation (92%)**New Delhi*

CERTIFICATIONS & ACHIEVEMENTS

- Cloud & DevOps:** Azure Zero to Hero (Udemy), AWS Cloud (Udemy), AWS Business, AWS Technical, AWS Sales, DevOps & AI (GeeksforGeeks)
- Development:** Agentic AI Developer (Ready Tensor), Full Stack Web Development (Sheriyans Coding School)
- Problem Solving:** Solved 300+ DSA problems across LeetCode, GeeksforGeeks, and Sheriyans Coding School
- Achievements:** Silver Medal (International Maths Olympiad 2014), 3x Bronze Medalist (National Science Olympiad)
